Lower Templestowe, VIC

SUMMARY

Cyber focused IT professional with enterprise support experience across endpoints, Active Directory, networking, incident troubleshooting, and secure user access. Building practical SOC skills through Wazuh/Sysmon log monitoring, security projects, AWS certification, and CCNA study, with a clear goal of moving into a Security Analyst role.

EXPERIENCE

Service Desk Analyst January 2026 – Present

ETHAN (Australia Pacific Airports (Melbourne) Tullamarine, VIC

- Delivered end-to-end IT support across Melbourne Airport environments, resolving hardware, software, network, and user access issues in a high availability enterprise setting.
- Provided rapid response and technical support for critical incidents, system outages, authentication failures while ensuring best security practices and minimal operational downtime.

Desktop Support Analyst December 2024 – January 2026

Australian Council for Educational Research Camberwell, VIC

- Delivered Tier 1 & 2 support across Windows and macOS environments, managing accounts via Active Directory, configuring systems with Group Policy, and resolving network issues (DNS, DHCP, VPN) to ensure reliable access.
- Streamlined device setup through scripted imaging and deployment, and administered SCCM/Intune for remote patching, software rollout, and endpoint compliance.
- Led a generative AI workshop to upskill staff, showcasing practical applications of tools like Copilot, Gemini, and ChatGPT to enhance productivity.

EDUCATION

Bachelor of Computer Science Graduated August 2024

Swinburne University of Technology Melbourne, VIC

Major: Cyber Security

PROJECTS

Log Monitoring with Wazuh & Sysmon | *Technologies used: Sysmon, Wazuh* Apr 2026 – May 2026

- Configured SIEM to collect, monitor, and analyze Windows security events, enabling detection of suspicious activities.

Web Application Firewall | *Technologies used: C#, .Net, Blazor* January 2023 – November 2023

- Created and configured custom security rules and filters to protect web applications from common threats, such as SQL injection and cross-site scripting (XSS), enhancing overall application security.

Building Network Attached Storage | *Technologies used: Samba, Ubuntu Server, Docker* June 2022

- Repurposed an old PC to build a Network Attached Storage (NAS) system, installing Ubuntu Server and Samba to enable file sharing and network access, resulting in a cost-effective and efficient storage solution.

CERTIFICATIONS

AWS Certified Cloud Practitioner 2026

Amazon Web Services (AWS)

- Validated foundational knowledge of AWS Cloud concepts, security, pricing, architecture, and core cloud services

Cisco Certified Network Associate – In Progress Expected 2026

Cisco

- Currently studying networking fundamentals, IP connectivity, network security, automation, and enterprise troubleshooting.
